

# Swimmingpool Test 3 in 1

en

## Pack content:

1 aluminium container with 50 test strips

## Hazard warnings:

This test does not contain any hazardous substances that require mandatory labelling.

## General indications:

Remove only as many test strips as are required. Close the container immediately after removing a strip. Do not touch the test fields.

## Additional indications:

1. Low pH readings may result when total alkalinity is less than 80 ppm.
2. Above 240 ppm the test field for total alkalinity turns blue.
3. The classification of values for free chlorine, alkalinity and pH has been done in accordance with limiting values for the USA.

## Instructions for use:

1. Dip the test strip with all test fields into swimming pool water for 5 seconds moving back and forth.
2. Shake off excess liquid.
3. Compare the test field for free chlorine with colour scale.
4. Wait 30 seconds.
5. Compare the test fields for alkalinity and pH with colour scale.

## Storage:

Avoid exposing the strips to sunlight and moisture. Keep container cool and dry (storage temperature not above +30 °C).
